Provide a brief explanation why any checked services were not included in the Assessment:	Node4 provides physical secure hosting facilities and data centre services to commercial customers. These facilities are used as co-location services, where Node4 are responsible for the physical security and environmental controls of the data centre rooms used by commercial customers.
	Node4 do not themselves store, transmit or process cardholder data (CHD) - they have no access at all to cardholder data. Node4 provide hosting services to clients that may require PCI DSS validation but that is not in scope for this audit.
	Therefore, Node4 offers PCI compliance as a co-location service provider, covering PCI DSS v4 requirements 9 and 12.

Part 2b. Description of Role with Payment Cards

(ROC Section 2.1)

Describe how the business stores, processes, and/or transmits account data.	Node4 provides physical secure hosting facilities and data centre services to commercial customers. These facilities are used as co-location services, where Node4 are responsible for the physical security and environmental controls of the data centre rooms used by commercial customers. Node4 do not themselves store, transmit or process CHD - they have no access at all to cardholder data. Therefore, Node4 offers PCI compliance as a co-location service provider, covering PCI DSS v4 requirements 9 and 12. .
Describe how the business is otherwise involved in or has the ability to impact the security of its customers' account data.	Node4 does not impact the security of their customer's CHD beyond requirements 9 and 12.
Describe system components that could impact the security of account data.	None

Part 2. Executive Summary *(continued)*

Part 2c. Description of Payment Card Environment

Provide a high-level description of the environment covered by this Assessment. *For example:* • *Connections into and out of the cardholder data environment (CDE).* • *Critical system components within the CDE, such as POI devices, databases, web servers, etc., and any other necessary payment components, as applicable.* • *System components that could impact the security of account data.*	No card payment services are present, and no cardholder data environment exists where Node4 stores, processes or transmits cardholder data. Processes focused on the requirements of PCI DSS sections 9 and 12, policies, physical security and maintaining robust infrastructure on which customers can deploy their solutions.

Indicate whether the environment includes segmentation to reduce the scope of the Assessment. (Refer to the "Segmentation" section of PCI DSS for guidance on segmentation)	☐ Yes ☒ No

Part 2d. In-Scope Locations/Facilities

(ROC Section 4.6)

List all types of physical locations/facilities (for example, corporate offices, data centers, call centers and mail rooms) in scope for this Assessment.

Facility Type	Total Number of Locations (How many locations of this type are in scope)	Location(s) of Facility (city, country)
Example: Data centers	*3*	*Boston, MA, USA*
Data Centres	4	Wakefield (DC3), Derby (DC1 and DC2) & Northampton (DC4), United Kingdom

Part 2. Executive Summary *(continued)*

Part 2f. Third-Party Service Providers
(ROC Section 4.4)

For the services being validated, does the entity have relationships with one or more third-party service providers that:

• Store, process, or transmit account data on the entity's behalf (for example, payment gateways, payment processors, payment service providers (PSPs, and off-site storage))	☐ Yes ☒ No

Section 3   Validation and Attestation Details

Part 3. PCI DSS Validation (ROC Section 1.7)

This AOC is based on results noted in the ROC dated *(Date of Report as noted in the ROC 2024-06-30)*.

Indicate below whether a full or partial PCI DSS assessment was completed:

☒ **Full Assessment** – All requirements have been assessed and therefore no requirements were marked as Not Tested in the ROC.

☐ **Partial Assessment** – One or more requirements have not been assessed and were therefore marked as Not Tested in the ROC. Any requirement not assessed is noted as Not Tested in Part 2g above.

Based on the results documented in the ROC noted above, each signatory identified in any of Parts 3b-3d, as applicable, assert(s) the following compliance status for the entity identified in Part 2 of this document *(select one)*:

☒	**Compliant:** All sections of the PCI DSS ROC are complete, and all assessed requirements are marked as being either In Place or Not Applicable, resulting in an overall **COMPLIANT** rating; thereby Node4 Limited has demonstrated compliance with all PCI DSS requirements except those noted as Not Tested above.
☐	**Non-Compliant:** Not all sections of the PCI DSS ROC are complete, or one or more requirements are marked as Not in Place, resulting in an overall **NON-COMPLIANT** rating; thereby *(Service Provider Company Name)* has not demonstrated compliance with PCI DSS requirements. **Target Date** for Compliance: *YYYY-MM-DD* An entity submitting this form with a Non-Compliant status may be required to complete the Action Plan in Part 4 of this document. Confirm with the entity to which this AOC will be submitted before completing Part 4.
☐	**Compliant but with Legal exception:** One or more assessed requirements in the ROC are marked as Not in Place due to a legal restriction that prevents the requirement from being met and all other assessed requirements are marked as being either In Place or Not Applicable, resulting in an overall **COMPLIANT BUT WITH LEGAL EXCEPTION** rating; thereby *(Service Provider Company Name)* has demonstrated compliance with all PCI DSS requirements except those noted as Not Tested above or as Not in Place due to a legal restriction. This option requires additional review from the entity to which this AOC will be submitted. *If selected, complete the following:*
