

Meeting Room Solutions

Seamless, secure and reliable meeting experiences

Workforces have become more dispersed and travel budgets have shrunk, yet collaboration remains an important part of business operations.

Employees expect video conferencing and online meeting tools that enable them to work productively, securely and seamlessly, especially in customer-facing meetings. Solutions which are difficult to use or unreliable can leave your workforce feeling frustrated and unproductive. Our Cisco Webex suite of solutions provide seamless, secure and reliable meeting experiences. Best of all, they enable colleagues, customers and partners to meet at the click of a button.

Webex Meetings

As a cloud-based meeting solution, you can meet whoever you want, whenever and wherever you want – even on the move with the Webex mobile app. Features include:

- HD-quality video and audio conferencing.
- Integrations with Outlook, Office 365, Google and more.
- Customisable video layouts.
- Facial recognition.
- Content sharing.
- Cloud-based recording and audio transcription.
- Meeting usage and performance analytics.
- Strong encryption, compliance visibility and control.

Webex Boards

Simplify collaboration in meetings with our all-in-one whiteboard, wireless presentation screen and video conferencing system.

- **Share ideas, reach decisions and work collaboratively towards business objectives** with the digital whiteboard. Content can be shared or drawings created from scratch and saved for later by anyone in the meeting space – even remote participants.
- **Save on valuable office space**, with your Webex Whiteboard functioning also as a video conferencing system and presentation screen.
- **Get maximum use out of your investment**, with a conference device that is easy to use. The Webex Board turns on when you enter the room, knows your meeting schedule and responds to voice commands.

Webex Events

Host webinars and online events that generate new leads, engage customers and attract partners.

Our Webex Events solution enables you to hold professional online events and corporate meetings for up to 1,000 participants.

Benefits include:

- **Reach global audiences and boost attendance** through real-time online events.
- **Engage audiences** with high quality video and audio, plus interactive content such as screen sharing, Q&A, polling and chat.
- **Position yourself as the expert**, with a branded webinar and the ability to host high-quality panel discussions.
- **Analyse your audiences**, with an enrolment process that allows you to score, track and follow up on leads.
- **Get the most out of your event**, recording it for future use and circulating to registrants who missed out.
- **Provide a high-quality event for all users**, including those on Android, iPhone and iPad devices.

✓	Easy to use Join meetings with the click of a button and enjoy HD-quality video and audio conferencing.
