Azure Windows Virtual Desktop Deployment Services
Key Features

Azure Windows Virtual Desktop Deployment Services

Rapid, hassle-free deployment by the experts, using Infrastructure as Code

When it comes to deploying Windows Virtual Desktop (WVD), misconfiguration or lack of knowledge can result in a solution that doesn't meet business requirements. Inadequate security, performance and functionality will disrupt workforce productivity and send costs spiralling as you spend more time trying to reconfigure your solution.

Our deployment service ensures you have a best practice build of WVD, supported by experts. We'll get your WVD solution deployed correctly first time, on time.

What's included in our Azure Windows Virtual Desktop Deployment Service?

- Initial design and sizing session.
- Cost forecast and customer design documentation.
- Deployment delivered via tailored Infrastructure as a Code script.
- Auto scale on-demand, based on a lean infrastructure model.
- 1:1 training and coaching on desktop image creation and maintenance.
- Configuration of monitoring and cost management dashboards.
- Configuration of supporting services such as Azure Firewall, VPNs, ExpressRoute and domain controllers.

Why Azure Windows Virtual Desktop?

Microsoft's next generation virtual desktop technology empowers your employees to stay productive, wherever they're working from. It offers the great user experience of desktop virtualisation technology at the affordable price of traditional remote desktop solutions.

Key benefits

✔	**Best practice build** Minimise disruption to your workforce and ensure that they can start gaining the benefits of WVD as soon as possible.
✔	**Rapid deployment** We deliver your solution via tailored Infrastructure as a Code script, allowing rapid and low impact deployment of changes and new host pools.
✔	**Tailored solution** Once we understand your requirements, we'll design and build your personalised deployment, which involves creating automated deployment scripts based on your parameters.
✔	**Expertise** Work with our Microsoft Azure accredited engineers to understand WVD and the options. We'll even provide 1:1 training around desktop image creation and maintenance.
✔	**Great user experience** Equip employees with a familiar desktop environment, so they can work productively wherever they are, whatever device they are using.
✔	**Enhanced security** Deliver a solution that's secure by design, including security features such as secure sign-on, Multi-Factor Authentication and role-based access control.
✔	**Value for money** Reduce compute costs, using a qualifying Microsoft 365 or Windows 10 licence to get the best price.
