Node4 Energy Policy

Energy Management System

DocumentLibraryForm

Public

08/03/2022

In accordance with ISO 50001, Energy management

Node4 owns four state-of-the-art Data Centre facilities: one in Northampton, one in Leeds and two in Derby, and a presence in Edinburgh, Manchester, Wigan and offices in Nottingham and Reading. Our Data Centres offer the latest in environmental and security technology, ensuring that even the most mission-critical applications are hosted securely and protected.

As an intense energy user, Node4 Limited shall strive to improve energy performance, reduce energy consumption costs, optimise capital investments for energy efficiency, and promote the long-term environmental and economic sustainability of its operations whenever possible. We are committed to:

- Reducing energy consumption in our operations through the establishment of objectives and targets;
- Ensuring continual improvement in our energy performance and the EnMS.
- We are committed to setting and reviewing energy targets.
- We are committed to upholding legal and other requirements regarding energy use, efficiency and consumption.
- We are considering energy performance improvements in the design and modification of our facilities, equipment, systems and processes.
- Emphasise energy performance as a factor in procurement decisions, product development and in-process and facility design.
- Secure adequate and reliable energy supplier at the most advantageous rates and implement contingency plans to protect operations from energy supply interruptions.
- Encourage continuous energy efficiency in work activities carried out by employees and other 'appropriate persons' working on behalf of or under the direct control of Node4 (contractors and suppliers).
- We are committed to ensuring the availability of information and necessary resources are allocated to achieve our objectives and energy targets.

Accountability and Governance

The Board of Node4 has approved this policy and our commitment to energy management across the organisation. The Head of Compliance is responsible for monitoring compliance with this policy, and its senior management supports this.

Training and Communication

Employees must familiarise themselves with this policy and ensure that they have the appropriate level of knowledge for their specific roles to improve energy performance.

Signed

Ian Thomas – COO 08/03/2022
