

SECURITY OPERATIONS CENTRE (SOC)

A TEAM OF SECURITY SPECIALISTS PROTECTING YOUR BUSINESS 24/7

AT THE HEART OF NODE4 LIES A 24/7 SECURITY OPERATIONS CENTRE (SOC), WHICH DETECTS AND PREVENTS CYBER SECURITY BREACHES THAT HAPPEN WITHIN YOUR ORGANISATION.

Our SOC provides you with an enterprise-class security and fraud detection facility as an extension of your own IT department. It merges state-of-the-art technology with our team of expert security analysts that monitor and protect your key assets and network 24 hours a day, 365 days a year.

To truly protect your environment, you need more than just the correct software. You need experts on hand to ensure that the software works efficiently for you. Node4 can evaluate your security situation and detect and prevent threats before they cause costly damage to your business.

WHAT NODE4'S SOC CAN DO FOR YOU

- Monitors your public, hybrid cloud and on-premise infrastructure
- Protects your key business assets
- Evaluates user behaviour patterns
- Detects and defeats malware, viruses, ransomware and Trojans
- Notes behaviour indicating policy violations, vulnerable software and suspicious communications
- Continuously monitors your network for vulnerabilities

MONITORED BY SPECIALIST SECURITY EXPERTS

Our SOC experts use industry-leading products combined with state-of-the-art security tools to ensure the best protection possible for your applications.

We also hold security certifications, including CEH, CSPA, CISSP and more.

KEY BENEFITS

- ✓ **MONTHLY FEE - NO CAPEX OUTLAY, MEANING YOU'RE IN CONTROL**
- ✓ **ACCESS A TEAM OF EXPERTS FOR FAR LESS THAN THE COST OF AN IN-HOUSE TEAM**
- ✓ **A CUSTOM-BUILD DASHBOARD, ALLOWING YOU ACCESS TO ALL ACTIVITY AND REPORTING**
- ✓ **THREAT INTELLIGENCE SERVICES MANAGE POLICY ACCESS TO HARMFUL SITES**
- ✓ **FREQUENT, DETAILED REPORTS REGARDING ATTEMPTED ATTACKS AND THWARTED THREATS**
- ✓ **24X7X365 MANAGED SERVICE, MEANING YEAR-ROUND PROTECTION**

PROACTIVE METHODOLOGY

Security experts proactively perform security tasks such as vulnerability assessments, malware research and penetration testing.

DASHBOARDS AND REPORTING

SOC services include access to a custom dashboard, giving you full visibility of live threats. Chat online with Node4 experts, review traffic, policies and access attack mitigation reports.

REDUCING THE ATTACK SURFACE

Rather than just waiting for attacks to happen, Node4 SOC proactively assesses your security posture to highlight any weaknesses in your infrastructure before they become compromised.

IN-DEPTH DEFENCE

Node4 has the expertise to help you assess your business security requirements from Cloud, mobile device management, endpoint protection and employee security awareness, all managed from a centralised location.
