

NETWORK DOCTOR

AN EXPERT HEALTH CHECK TO ENSURE THE SMOOTH RUNNING OF YOUR NETWORK INFRASTRUCTURE.

NO MATTER YOUR INDUSTRY, IT'S LIKELY THAT YOUR NETWORK LIES AT THE HEART OF YOUR BUSINESS – SO KEEPING ON TOP OF ITS OVERALL HEALTH PLAYS AN IMPORTANT PART IN MINIMISING RISK.

A healthy network infrastructure enables seamless connection between your customers, employees and partners and, ultimately, supports you in delivering your core products and services. This means any risk of an outage can jeopardise your smooth running and ability to deliver.

At Node4, we understand that networks can be complex things – so why not leave it to our experts to ensure that your organisation's infrastructure is operating at optimal levels and supporting your business as well as it can?

Our Network Doctor is a health check consultancy service created to help you understand, monitor and improve your network performance, offering a structured assessment of your network's vital signs.

A remote consultation enables us to gather the information we need to make an expert assessment of your network. We'll talk about your business, network and any known challenges that you are facing, before producing a report that delivers actionable insights and recommendations for improvement.

KEY BENEFITS

AN EXPERT EYE FOR PEACE OF MIND

Gain confidence that your network is secure and resilient with a careful assessment from the Node4 team.

MAXIMISE THE VALUE OF EXISTING NETWORK INVESTMENTS

Uncover whether your infrastructure is delivering a solid return in line with expectations and get expert advice on instances where change could be in your best interests.

IDENTIFY COST-SAVING AND CONSOLIDATION OPPORTUNITIES

Identify areas where you may be able to consolidate services to deliver cost savings and deliver an even bigger return on investment across your organisation.

It's always good to know that your money is being wisely spent and that your technology is delivering a return on investment. By opting for the Node4 Network Doctor, you can uncover whether your infrastructure as it should and find out first-hand from our experts where change could be in your organisation's best interest.

As well as analysing your network performance and return on investment, our industry pros will evaluate your infrastructure to help identify areas where consolidation could make the most financial sense.
