

DATA ANALYTICS AND REPORTING ASSESSMENT

THE NODE4 DATA ANALYTICS AND REPORTING ASSESSMENT SERVICE HELPS YOU TO LEVERAGE THE POWER AND VALUE OF YOUR DATA BY CREATING ACTION-FOCUSED VISUALISATIONS THAT TELL YOUR DATA STORY.

If your organisation has multiple data sources stored in different locations and you need to derive more value from the data, the Node4 Analytics experts are available to assess how best to maximise the value from PowerBI to make better informed business decisions.

Our data analytics and reporting assessment is typically delivered over five days and encompasses:

- 
Overview of Current Reporting Framework: We'll gain an understanding of the "as is" business intelligence reporting and its suitability for business requirements.
- 
Aspired Reporting Outcomes: We'll review the desired reporting goals and assess current tools and skills.
- 
Report and Presentation: We'll present our recommended strategy and approach focussing on.

Why – Our proposed strategy
What – Detailing examples of delivered solutions
How – Our project approach to achieve your business objectives

The end result of the Data Analytics and Reporting Assessment is a demonstration of the value of data analytics and visualisation for your business using Power BI. We aim to help you discover new insights, trends, and patterns from your data, and communicate them effectively to your stakeholders and customers.
