

CLOUD INNOVATION WORKSHOP: AZURE AI

START YOUR TRANSFORMATION JOURNEY WITH AN INTENSIVE DEEP DIVE INTO KEY AZURE AI CONCEPTS

EMBARK ON A TRANSFORMATIVE JOURNEY WITH OUR "CLOUD INNOVATION WORKSHOP" A BESPOKE ENGAGEMENT DESIGNED TO UNLOCK THE POTENTIAL OF AZURE AI FOR YOUR BUSINESS.

This engagement has been designed to be flexible – for example we can still help clients who are new to the cloud – but increasingly we see the primary use being to help clients understand how they can unlock the competitive advantages that Azure AI can offer.

Over a number of days, one of Node4's expert Consultants will facilitate sessions that are designed to transfer knowledge and help determine how the power of Microsoft Azure can be harnessed to overcome your business challenges.

The exact format varies according to the use case, but Azure AI is a particularly hot topic and the structure for an Azure AI workshop would be:

- Day 1 will demystify AI, introducing Azure's AI capabilities.
- Days 2/3 dive deep into understanding your challenges, enabling personalised demo experiences.
- Day 4 provides insights into a tailored AI roadmap.
- Day 5, delivers a comprehensive Statement of Work (SOW), charting a course for integrating solutions like Azure AI Landing Zone and Private ChatGPT, to revolutionise your business processes and empower data-driven decision-making

Join us to elevate your enterprise with the power of Azure AI.

KEY FEATURES

- Azure AI capabilities overview including customised Azure AI demonstrations.
- Client-specific problem analysis to deliver a comprehensive Statement of Work.
- Tailored AI roadmap development and strategic AI implementation guidance.

KEY BENEFITS

- ✓ Facilitates informed data-driven decision making
- ✓ Accelerates the digital transformation journey
- ✓ Scalable Azure infrastructure for growth
- ✓ Cloud adoption aligned to Microsoft's published best practices without a steep learning curve
- ✓ Access to certified Azure architects for expert advice
- ✓ Accelerated cloud transformation and innovation
- ✓ Enhances business efficiency with AI integration
- ✓ Streamlines operations using Azure AI
- ✓ Provides competitive edge with cutting-edge AI
- ✓ Empowers staff with AI insights and automation

- Azure AI Landing Zone overview.
- Private ChatGPT introduction.
- Retrieval Augmentation Generation (RAG) architecture overview.
- Copilot Studio integrations.
- Delivered by certified Cloud Architects from an Azure Expert MSP partner.
- Fully aligned to, and builds upon, the Microsoft Cloud Adoption Framework for Azure and Microsoft's Azure best practices.
- Integrated with other Node4 consulting engagements to help your organisation on its journey to the cloud.
- Aligned to industry regulations and standards such as ISO 27001, UK Police NEP, NHS, and MOD standards.
- Customisable engagement to suit your organisation's specific requirements.

HOW DOES THE ENGAGEMENT WORK?

As a Consulting engagement, we can adjust it to meet your exact requirements but, in general, our Cloud Innovation Workshop service works as a series of workshop discussions and demonstrations culminating in the production of a Statement of Work to outline the forward path.

CLIENT DEPENDENCIES

We'll need some information from you, to make sure that we're able to carry out the engagement and provide the expected output:

- Attendance at the workshops by people from your organisation that are able to discuss and comment on business challenges and priorities.
- We'll also need you to manage the relationships with any third parties that are involved. We're happy to speak with your business partners where necessary, but we need you to own the discussion.

WHAT WILL I GET AT THE END OF THE ENGAGEMENT?

In addition to the features and benefits listed throughout this document the engagement will provide you with access to an Azure expert and knowledge transfer around key concepts and technologies.

We'll also furnish you with clear next steps and an idea of the effort involved in moving forwards.

FOR MORE INFORMATION

Speak to your Node4 representative or contact us using the details at the bottom of the page.

THE NODE4 PUBLIC CLOUD JOURNEY

Our journey map shows how this engagement complements other Node4 services on your organisation's cloud journey
