AZURE CLOUD TECHNOLOGY ACCELERATORS

ACCELERATE YOUR DEPLOYMENT OF CLOUD TECHNOLOGY SOLUTIONS

NODE4'S TECHNOLOGY ACCELERATORS ARE DESIGNED TO HELP YOUR ORGANISATION ADOPT CLOUD, QUICKLY.

Whatever your cloud deployment model – private, public or hybrid – we have Technology Accelerators that provide a rapid way to deploy technology solutions into your chosen cloud.

We have several accelerators, each with a different focus:

- **Azure AI Landing Zone Accelerator:** Unlock AI's full potential securely and efficiently with Azure AI Landing Zone Accelerator – your pathway to innovative, secure, and scalable AI solutions that keep data within your corporate environment.

- **Azure Arc Accelerator:** Seamlessly extend Azure management anywhere with Azure Arc Accelerator – bringing cloud innovation, governance, and security to your on-premises, hybrid and multi-cloud environments.

- **Azure Sentinel Accelerator:** Enhance your security posture with Azure Sentinel Accelerator – turning data into actionable insights for a proactive and intelligent cybersecurity defence – whether that's on-premises, in Azure or in a hybrid cloud.

- **Azure Virtual Desktop Accelerator:** Replace expensive legacy infrastructure ad empower remote productivity and flexibility with Azure Virtual Desktop Accelerator – delivering secure, scalable, and seamless virtual desktops and applications to any device, anywhere.
We can scope the engagement according to your requirements and adjust the consulting days accordingly.

KEY FEATURES

- Quickly deploy a proof of concept for one of several Azure technologies.
- Delivered by certified Cloud Architects from an Azure Expert MSP partner.

KEY BENEFITS

- Offers quick, efficient technology deployment for business agility
- Facilitates smooth onboarding to a variety of Azure tech platforms
- Provides minimum time to maximum value
- Cloud adoption aligned to Microsoft's published best practices without a steep learning curve
- Access to certified Azure architects for expert advice
- Assurance of alignment with Microsoft's recommended practices
- Accelerated cloud transformation and innovation
- Addresses cloud skills gaps through knowledge transfer
- Ability to focus on the areas that are important to your organisation

- Fully aligned to, and builds upon, the Microsoft Cloud Adoption Framework for Azure and Microsoft's Azure best practices.
- Integrated with other Node4 consulting engagements to help your organisation on its journey to the cloud.
- Specific services to focus as required on Azure AI, Azure hybrid cloud (Arc), Azure SIEM (Sentinel) or Azure Virtual Desktop.
- Accelerates time-to-value while ensuring security, compliance, and operational efficiency.
- Ongoing management available through Managed Services add-on.
- Aligned to industry regulations and standards such as ISO 27001, UK Police NEP, NHS, and MOD standards.
- Customisable engagement to suit your organisation's specific requirements.

HOW DOES THE ENGAGEMENT WORK?

As a Consulting engagement, we can adjust it to meet your exact requirements but, in general, our Technology Accelerator services work as follows:

- Workshop, facilitated by an expert Azure Consultant, to understand the current state and to draw out any information about your environment that we need for the to install the technology.

- We'll then run our scripts to set things up for you, within the selected area (e.g. Azure Arc, Azure OpenAI, etc.).

- We'll provide guidance to help you get the most of the new technology as you get to know it and determine whether it's a good fit for your organisation.

CLIENT DEPENDENCIES

We'll need some information from you, to make sure that we're able to carry out the engagement and provide the expected output:

- Attendance at the initial workshop and at the playback session.

- We may also need administrative access to your Microsoft Azure tenant.

- We'll also need you to manage the relationships with any third parties that are involved. We're happy to speak with your business partners where necessary, but we need you to own the discussion.

WHAT WILL I GET AT THE END OF THE ENGAGEMENT?

The aim of these engagements it to get an environment up and running quickly. They are intended to be used for a proof of concept and we do not provide documentation. If you decide to leave the environment in place and put it into production, then it will need some design and planning. Of course, Node4 would be happy to assist with this, but it's not part of the Technology Accelerator service.

Speak to your Node4 representative or contact us using the details at the bottom of the page.

THE NODE4 PUBLIC CLOUD JOURNEY

Our journey map shows how this engagement complements other Node4 services on your organisation's cloud journey

ANALYSIS AND STRATEGY

- Cloud Maturity Assessment
- Cloud Solution Assessment
- Cloud Application Assessment
- Cloud Readiness Assessment
- Cloud Innovation Workshop
  - Azure AI

Establish a baseline and a clear forward path

Deep dive into the possibilities

PLAN AND IMPLEMENT

- Cloud Deployment Services
- Cloud Migration Services
- Cloud Technology Accelerators — You are here
  - Azure AI Landing Zone
  - Azure Arc
  - Azure Sentinel
  - Azure Virtual Desktop

Establish a Landing Zone

Migrate selected workloads to the cloud

Rapid deployment of selected technology platforms

RUN AND EVOLVE

- Cloud Automation Consulting
- Cloud Centre of Excellence (CCoE)
- Cloud Well-Architected Review
- Cloud Optimisation

Establish DevOps processes

Embed a DevOps culture

Continuous improvement

Value-add Services
- Licensing Services
- Managed Services
- Licensing Services

Advisory Services: Project Management, Business Analysis, Enterprise Architecture
